

Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, — 8-June — , 1885.

Sir,

Your favor of this date is just received, enclosing a copy of a letter, dated April 9th 1885, from the Superintendent of the New York Assay Office to the Director of the Mint, recommending certain reductions in the charges for parting and refining Gold and Silver, and asking me to examine and report upon the advisability of the proposed reductions.

I have examined them and respectfully report as follows:

The methods of Refining in the Mint of the United States at Philadelphia, and in the Assay Office at New York, are so different from each other that it is impracticable for me to express a decided and reliable opinion; especially

Mint of the United States at Philadelphia, 2

MELTING AND REFINING DEPARTMENT,

Philadelphia, — 8th June —, 188—

as some of the proposed divisions are resultant from the sulphuric process, which the Assay Office employs, and which we do not. I may however be permitted to remark that too great refinement in establishing rates for subdivisions of allowed fineness is objectionable in business relations between the Mint and the Public. Otherwise I perceive no objection to the Proposed table of Charges, which in my opinion do not contravene the interests of the Government.

Very Respectfully

J A C Booth

Hon. A. Loudon Snowden, M. & R.

Superintendent.
